(54) DATA RECEIVER AND DATA RECEPTION METHOD

(57) Abstract:

PURPOSE: To improve use convenience of a receiver for receiving data superimposed on the blanking period of television broadcasting signals.

CONSTITUTION: In a broadcasting station, the data are superimposed on the vertical blanking period of the television broadcasting signals and transmitted. The television broadcasting signals are received by an antenna 11 and supplied to the receiver 12. The kind of the data desired by a user is set beforehand in the receiver 12 and only the data of the set kind are outputted to a recording medium 14 and recorded.
